As a .NET developer, I am always in pursuit of learning. My enthusiasm lies in working within a creative and dynamic environment. I possess a knack for logical thinking when solving algorithmic problems and find joy in analysis and facing challenges. Beyond technical skills, I thrive in teamwork, fostering great relationships with my colleagues. Additionally, I quickly grasp and excel in learning new concepts and subjects. Any problem that is challenging or tedious for others is an intriguing challenge for me.

EXPERIENCE

July 2023 – January 2024

Daneshkar training bootcamp

SOFTWARE ENGINEERING | C# | ASP.NET CORE

During a six-month professional course at Daneshkar, an educational boot camp associated with the University of Science and Industry, I excelled as one of the top graduates. This intensive program provided an immersive experience in teamwork dynamics, where we collaborated on several group projects for the course's final assignment, projects we're still diligently perfecting. Throughout the boot camp, our focus remained on acquiring a professional and in-depth understanding of software engineering principles.

EDUCATION

Sep 2023 - present

- Master of Science in Artificial Intelligence (In Progress)

Sep 2019 – June 2023

- Bachelor of software engineering (IAU)

SKILLS

- C#, .NET Core, ASP.NET mvc
- SQL Server
- Entity Framework, LINQ
- SOLID principles
- OOP
- Clean code, KISS, DRY
- Familiar with Clean architectures & design patterns
- HTML, CSS, JavaScript
- Git, GitHub
- Middleware, DI
- Familiar with web API concepts
- Agile, Scrum
- Interactivity and flexibility in teamwork
